

# Back to School!

## Protect Our Native Youth from Getting COVID-19

**If school starts in your area and you have opted for in-person or hybrid classes for your child, consider these tips:**

- 1. Prepare them to wear a mask during all school-related activities, and when possible, encourage them to practice social distancing.**
- 2. Provide a clean zip-top bag for your child to keep their mask in during lunch.**
- 3. Remind them to pack and use hand sanitizer, not share objects with others, and to sanitize personal electronics.**

**Check with your school district, local health department, local Indian Health Service or tribal clinic, for more information.**
